Leach Mini Rear Loader

LEACH MINI REAR LOADER – BIG PERFORMANCE, SMALL FOOTPRINT.

The new Leach Mini Rear Loader is designed to deliver maximum efficiency in a compact package. Built for tight urban streets, alleyway collections, and restricted spaces, it offers exceptional maneuverability without compromising on capacity or performance.

With a narrower yet longer body, better chassis integration, and an operator-friendly design, the Mini Rear Loader is the smart solution for municipalities and private haulers looking for versatility, affordability, and ease of operation.

Available in both Diesel and EV configurations, it's built for today's needs and tomorrow's demands.

Laying the foundations for a truly exceptional product.

LEACH™ INNOVATIONS

With a strong emphasis on innovation, Leach's engineering team has crafted a comprehensive range of customizable options to cater to even the most stringent customer requirements. We are poised and eager to embrace emerging industry trends and fulfill evolving customer demands. This perpetual cycle of innovation positions Leach™ as the forefront leader in rear loader solutions across North America.

WEIGHT DISTRIBUTION

Over years of innovation, Leach™ trucks prioritize ideal weight distribution in all models. Our ongoing objective is to achieve the perfect material balance, ensuring models collect more waste while maintaining the highest legal payload.

DESIGNED FOR TIGHT SPACES

A narrower, longer body enhances maneuverability in tight streets and alleys, reaching areas larger trucks can't. Compact footprint, maximum efficiency.

HYDRAULICS FOR QUICKER OPERATION

An efficient hydraulic system delivers faster packing and dumping cycles, reducing route time and fuel consumption while increasing collection efficiency.

EASY MAINTENANCE

A two-piece tailgate provides quick access for maintenance, reducing downtime and costs.

LIGHT & STRONG

Optimized weight distribution increases fuel efficiency and legal payload, while reinforced body panels ensure durability in demanding environments.

LOW HOPPER SILL

A low-profile hopper makes manual loading easier and faster, reducing strain on workers while improving collection speed and efficiency.

SAFE & SMART INTERLOCKS

Built-in safety interlocks prevent pump activation unless controls are neutral, ensuring operator safety and system reliability.
